Testing Date	December 2025

Test Scenarios and Results

1. Layout and Styling

- Verified that CSS styles load correctly in all browsers.
- Checked page alignment, fonts, colors, and images.
- Confirmed that animations and transitions work as expected.

Result: Layout rendered consistently across all tested browsers.

2. Navigation and Links

- Tested main navigation menu links.
- Tested breadcrumb navigation.
- Verified external links (Cairo University, social media).

Result: All links functioned correctly with no broken paths.

3. Forms and User Input

- Tested registration form input fields.
- Verified form validation messages.
- Confirmed correct redirection to the Thank You page.

Result: Forms behaved correctly in all browsers.

4. JavaScript Functionality

- Tested Budget Calculator calculations.

- Verified JavaScript execution without errors.
- Checked browser console for warnings or errors.

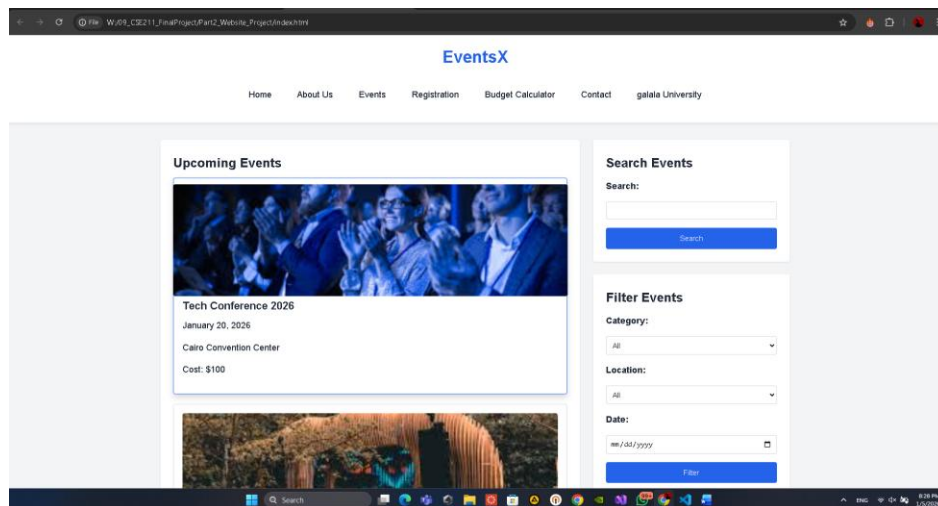

Result: JavaScript functionality worked correctly across all browsers.

5. Responsiveness

- Tested different screen sizes using browser developer tools.
- Verified mobile and tablet layouts.
- Checked navigation usability on smaller screens.

Result: Website responded correctly to different screen sizes.

Google Chrome Browser

Microsoft edge browser
