

Group 9 – Final Course Project

Youssef Atta Mohamed (223103574)

Mohamed Ahmed Mohamed (224200083)

Wahballah Ahmed Wahballah (221100971)

Ziad Abdullah (221101546)

Submission Date: Sunday, 6 January 2026

Under the Supervision of (prof . Samy Ghoneimy)

Executive Summary

This report documents the final project for the CSE211 Web Programming course. The project is a fully functional web-based event management system designed to demonstrate essential web development skills using HTML5, CSS3, JavaScript (ES6), and optional back-end technologies. The system enables users to browse events, register through interactive forms, calculate budgets, and interact with dynamic content in a responsive and accessible interface.

The project follows a clear separation of concerns. HTML was used to create semantic and accessible structures, CSS handled responsive layouts and styling, and JavaScript implemented dynamic behavior such as form validation, event filtering, and calculations. Bonus features such as backend integration, deployment, and documentation were also included.

The team collaborated using GitHub and applied validation and testing to ensure compliance with web standards. The final system fulfills both functional and non-functional requirements and reflects the practical application of course concepts.

References

The following references were used during the development of this project:

- MDN Web Docs
- W3C HTML & CSS Validation Services
- **CSE211 Web Programming Course Materials**, Lecture Slides and Lab Sheets
- HTML5 documentation provided during the course
- Instructor examples and class demonstrations

Appendix A: AI Assistance Acknowledgment

Artificial Intelligence tools were used to assist with language refinement, structuring, and formatting guidance. All core ideas, implementation, and final decisions remain the responsibility of the project team.

Appendix B: Team Contribution Breakdown

1. Youssef Atta Mohamed – HTML Developer

Responsible for all HTML pages, semantic structure, navigation, forms, accessibility, and validation.

2. Mohamed Ahmed Mohamed – CSS Developer

Responsible for styling, responsive layouts, animations, media queries, and CSS validation.

3. WAHABALLAH Ahmed Wahballah – JavaScript Developer

Responsible for DOM manipulation, form validation, filtering logic, budget calculator, and testing.

4. Ziad Abdullah – Bonus & Documentation

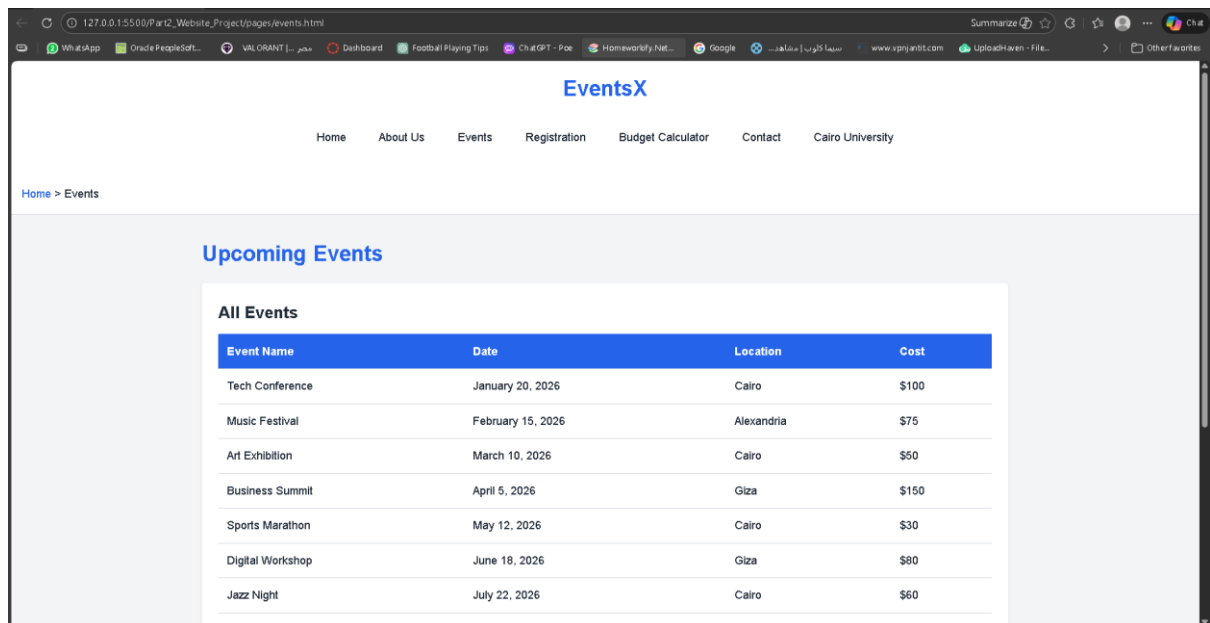

Responsible for backend integration, hosting, GitHub management, documentation, validation reports, and final integrations .

Appendix C: Additional Visualizations

Supplementary figures, diagrams, and visual materials relevant to the project are included here.

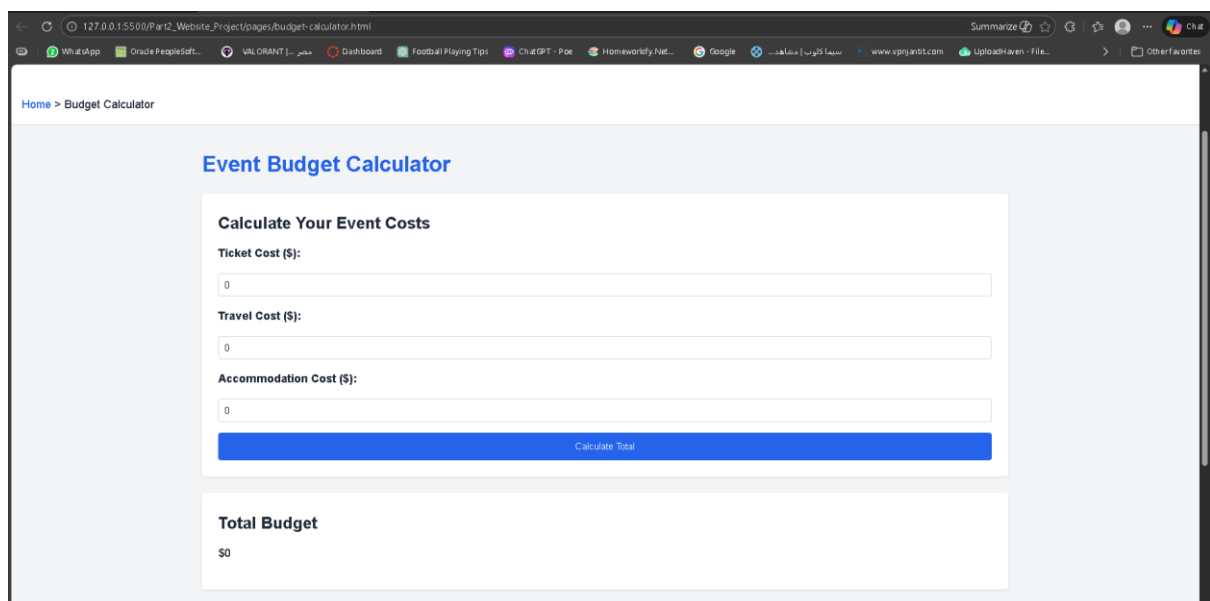

Appendix C: Additional Visualizations

Figure C.1: Events Page Interface

Event Name	Date	Location	Cost
Tech Conference	January 20, 2026	Cairo	\$100
Music Festival	February 15, 2026	Alexandria	\$75
Art Exhibition	March 10, 2026	Cairo	\$50
Business Summit	April 5, 2026	Giza	\$150
Sports Marathon	May 12, 2026	Cairo	\$30
Digital Workshop	June 18, 2026	Giza	\$80
Jazz Night	July 22, 2026	Cairo	\$60
